VICTIM IMPACT STATEMENT

“Nothing has cause me greater shock, discuss and disbelief after hearing that my savings had disappeared. I was horrified and mortified but the nightmare grew worse. The government decided to compensate some funds but not others. I had a self-managed fund and was accused of being outside the flags, that I took risks and it was my choice to be in troubled funds. Bad enough to have my money stolen without being insulted by lies. I was informed that the people with self-managed funds must seek advice from a solicitor about compensation in Trio. I was told that if you want compensation you must be in, if you are not in, you get nothing. Being in meant I was required to hate my financial advisor. All this hatred and backstabbing was the indirect result of being a victim of the fraudsters. My future dreams were stolen. No longer could I feel proudly independent. The fraud robbed of me more than money. This fraud event has shown me how corrupt the government has been surrounding Trio.”
